NEW FRONTIERS IN BEAUTY

Beyond the mainstream, a spectrum of specialised niches is flourishing. From taboo beauty to 'ugly' beauty, brands are carving their unique path in the cosmetics industry. Their consumers are those looking for solutions that stretch beyond ageing or acne. Instead, they are seeking expert help on areas such as intimate feminine care or melanin-rich skin care solutions. This unexplored future landscape represents opportunities to meet the less-talked-about needs and concerns of the modern beauty consumer – ultimately creating new categories in beauty. In this webinar join us and our industry experts as we explore the new frontiers in beauty and discover how cosmetic innovation can meet previously unforeseen needs and desires.

14

SUN CARE

As the US moves into the hot and sunny summer months, consumers are gearing up for outdoor activities and preparing by stocking up on sun care and protection products. CosmeticsDesign has curated some of the most interesting and innovative updates in the sun care and protection space in this special edition newsletter, including new ingredients, cutting-edge research, and exciting product launches.

BEAUTY FROM WITHIN

Our annual Beauty-from-Within webinar, co-hosted with our sister publication NutraIngredients-USA, will return with a new panel of experts to peel back the skin on all things nutricosmetic. Seeing is believing when it comes to beauty-from-within or anti-aging ingredients and formulations and products need to deliver the visible benefits many consumers expect. The likes of collagen and biotin are front and center on many 'nutricosmetic' products, but what does the science say about their efficacy? What other ingredients are emerging and how do these bioactives work? What companies are driving the sector? How is it influencing product design and marketing? And can we really see a difference? This webinar will provide answers to these questions and many more.

INGREDIENT FORMULATION TRENDS

As research teams continue to discover innovative new ways to produce more effective ingredients for cosmetic and personal care products, it can be challenging for manufacturers and suppliers to stay up to date with the latest developments in these industry spaces. In this Special Edition newsletter, CosmeticsDesign examines the most compelling trends in ingredient options like silicones, biosurfactants, and actives for end-stage product formulation.

OCTOBER

02

SKINCARE ADVANCEMENT

With seasonal changes come the opportunity for consumers to reassess their skin care routines, and possibly reconsider their product selections with a keen eye on recent product advancements in the space. In this webinar, CosmeticsDesign will speak to the experts for insight into the latest trends in skin care and their potential impact on the consumer – and what this means for manufacturers and suppliers in this space. We’ll be discussing topics like ‘cleanical beauty,’ Beauty Rx, skin cycling, anti-aging ingredients, the application of AI on product formulations, and more.

18

INNOVATIONS IN SKIN CARE

Skin care techniques and products are always evolving – from creative new device technology and applications of AI/AR to supplement options addressing ‘beauty from within concerns’ and more. In this CosmeticsDesign Special Edition newsletter, we’ve rounded up some of this year’s most compelling advancements in the skin care space for your review.

NOVEMBER

UPCYCLING/INGREDIENTS TRANSPARENCY

Environmental sustainability has become the industry standard in recent years for cosmetics and personal care product manufacturers and suppliers. With so much work being done in this space, CosmeticsDesign has focused on ingredient upcycling and transparency practices and technologies as one of the emerging tenants of sustainable industry practices. In this Special Edition newsletter, we’ve curated articles covering topics like the digitization of ingredient transparency platforms, ingredient upcycling programs from industry leaders, and more to keep you informed on the most important and up to date information in this area.

MoCRA

MoCRA’s application has now been in place for just over a year. In June of last year, the FDA issued labelling requirements regarding fragrance allergens, and as of December 29, 2024, all cosmetic packaging must now include contact details for adverse reporting. On that same date, the FDA was required to issue a proposed regulation for Good Manufacturing Practices (GMP). In this CosmeticsDesign Special Edition Newsletter, we’ve curated articles regarding PIM and PMD software to support cosmetic manufacturers and suppliers in MoCRA compliance, as well as information detailing upcoming MoCRA compliance deadlines for 2025 and resources explaining the FDA’s proposed regulations on GMP to answer your burning questions on adhering to MoCRA regulations in 2025.
