BEVERAGE TREND WATCH
Consumers want guilt free beverages that nourish, refresh, hydrate, indulge or help power them through the day. From the much hyped low-to-no craze to the war on sugar, what’s hot and what’s not in the drinks sector?

JANUARY 17

FLAVOUR AND COLOUR TRENDS
Consumers want to be excited by their food choices. From colours that pop on Instagram to fashionable flavours that tap into foodie fads, what flavour and colour trends will shape innovation in 2024?

MARCH 12

POSITIVE NUTRITION

FOOD AS MEDICINE
You are what you eat. An old adage but one that has gathered new meaning as we unpick the relationship between our diets, physical health and mental wellbeing. From adaptogens and botanicals to pre- post- and pro-biotics, what ingredients are emerging in the preventative health space?
WHAT IS THE FUTURE OF DAIRY?
From methane reduction to regenerative farming and precision fermentation, the dairy landscape is fast evolving. FoodNavigator profiles the latest developments powering protein innovation.

GUT HEALTH: FEEDING THE MICROBIOME
The gut is considered the ‘first brain’, and consumers are increasingly aware of the need to nourish it. Leveraging prebiotics to postbiotics and symbiotics, how is the food and beverage industry feeding the microbiome with wellness front-of-mind?

PROTEIN VISION: INNOVATIONS IN ALTERNATIVE MEAT AND DAIRY
From plant-based to cell cultured, alternative meat and dairy promises sustainability on a plate. But amid signs of a category slowdown, is that enough? This two-day interactive broadcast event will examine the technology, ingredients and culinary science propelling innovation in the space.

DAY 1 – Protein Vision: Alt Meat
Developments in meat alternatives aim to better taste, texture, and nutrition. Are they succeeding? FoodNavigator asks which technologies and ingredients are winning with consumers, and where whitespace for innovation remains.

DAY 2 – Protein Vision: Alt Dairy
The global dairy alternatives market is projected to reach over $61bn by 2029. As it grows, so too does innovator – and consumer – appetite for new ingredients and product formats. Join us as we examine the trends shaping the future of alt dairy.

<th>Date</th>
<th>Topic</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>JUNE</td>
<td>BETTER-FOR-YOU SNACKS</td>
<td>Consumers want tasty snacks, without the guilt. How is this category, with a traditionally unhealthy reputation, working to change its image with less fat, salt, and fewer calories? FoodNavigator highlights the latest developments in the healthier snacks market.</td>
</tr>
<tr>
<td>JULY</td>
<td>RESPONSIBLE SOURCING OF HIGH-RISK COMMODITIES</td>
<td>From palm oil to soy, cocoa to coffee, some of the food industry’s most used ingredients have strong links to deforestation. From traceability tech to transparency commitments, we look at how manufacturers are working to eliminate environmental violations from their supply chains.</td>
</tr>
<tr>
<td>AUGUST</td>
<td>FOOD FOR KIDS</td>
<td>Children need good nutrition from the get-go. From infant formula to pre-prepared foods and ready meals, we look at different ways industry is designing food to support development in kids’ early years as well as healthy eating habits for the future.</td>
</tr>
<tr>
<td>SEPTEMBER</td>
<td>INNOVATION IN SUGAR REDUCTION</td>
<td>Faced with overweight and obesity crises, and tougher regulations, manufacturers are under pressure to limit the amount of sugar in food and beverage formulations. Consumers also want to see less sugar on-pack, and favour ‘natural’ clean label alternatives. What innovation opportunities can these demands unlock?</td>
</tr>
</tbody>
</table>
### CLIMATE SMART FOOD
How can the food industry contribute to food system transformation and provide sustainable nutrition for personal and planetary health? Over three days, FoodNavigator addresses the carbon impact of food production and consumption in its interactive broadcast event Climate Smart Food.

### SEPTEMBER 24-26

<table>
<thead>
<tr>
<th>OCTOBER 16</th>

### 2025

**FEBRUARY 19**

**WHAT'S TRENDING IN FLAVOURS AND COLOURS?**

Much of food’s appeal comes down to looks and taste. In a world dominated by social-media buzz, these factors are influencing purchase behaviour even more. We highlight the colours predicted to pop and flavours to make your jaw drop in 2025.

**JANUARY 15**

**WELLNESS INGREDIENTS FOR HOLISTIC HEALTH**

Consumers are asking for functional food that promotes health and holistic nutrition. How are manufacturers responding, and are their innovations backed up by the latest nutritional science?

**MARCH 19**

**POSITIVE NUTRITION**

How can food innovation support population health? FoodNavigator places the link between diet and wellness in the spotlight with its three-day interactive broadcast event Positive Nutrition: Healthy Innovation for the Mass Market.

**TRENDING BEVERAGES: FROM NON-ALCOHOLIC TIPPLES TO FUNCTIONAL DRINKS**

The drinks category has exploded in recent years, with functionality leading the way. Consumer thirst shows no signs of drying up. From low and no alcohol to CBD softs and gut-friendly beverages, we profile the trends shaping the drinks category.
